Subject Greetings from New York

Hello from the MoMA in NYC!

The art here is really cool. Walking around, it felt like I was in a special place with lots of different (1) colors and shapes. One piece of art, by Kandinsky, was especially interesting (2). I could look at it for a long time and find new things in it.

The sculptures (3) made me think about space, and the paintings (4) made me try to find order in their mix of shapes (5). The films were different, telling stories in a new way.

One picture I liked showed a city, capturing the busy life there. Even with all the noise (6), it felt calm and made me think about everyday life.

The building itself is like art, with its cool (7) design making everything better (8). Exploring the Museum of Modern Art has been great (9), showing me how different and interesting (10) modern art can be.

I wish you could see it too!

Best,

Jamie
