Making a game can be fun! Here's what you need to do:

1. **Get Your Team:** Find people to help you, like designers (1) and testers. Make sure they don't tell anyone about your idea.
2. **Make the Game Parts**: Create things like pictures, sounds (2), and levels for your game.
3. **Write the Code:** Hire people who know how to write computer code (3). They'll make your game work.
4. **Test (4) Your Game:** Try playing your game with different (5) people to find problems and fix them.
5. **Tell People About Your Game**: Start talking about your game early (6). Make ads and tell people who like games.
6. **Put Your Game Out:** Sign up to put your game where people can get it. Make sure it's good enough first (7).
7. **Keep Making It Better:** Listen to what players say and fix (8) problems. Make your game even more fun.

Follow (9) these steps, and you can make a game that people will like (10) .
